

What do the  
parts of the  
plants do?

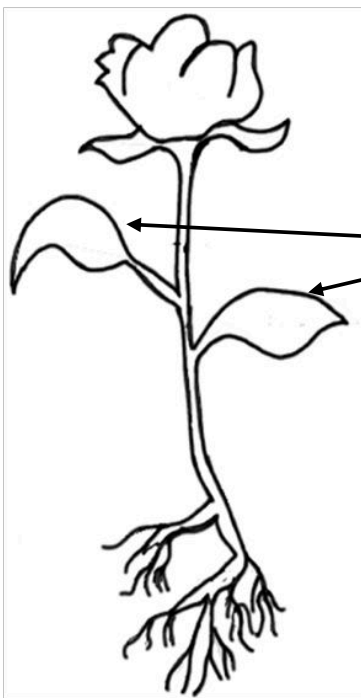

by: \_\_\_\_\_

The \_\_\_\_\_  
brings water and  
food to the rest of  
the plant.

The \_\_\_\_\_  
absorb water and  
hold the plant in  
the soil.

The \_\_\_\_\_  
use the sun and  
air to make food  
for the plant

The \_\_\_\_\_  
makes new seeds,  
and sometimes  
fruit!

The \_\_\_\_\_  
is the start of  
growing a new  
plant.
